Subject: Al Rinka Compliment

Hi Craig,

I had the opportunity to meet Al Rinka from Gremmer on our Medford project today during a pier shaft pour. I just wanted to say he is very sharp and a great hire for Gremmer. I was really impressed with him, his knowledge, and his ability to anticipate potential problems. Just the way he checks Lunda's work and make sure that things are right is really great to see. I see so many engineers now who do not do take those steps anymore around the state. I think he really understands that the best projects are when the contractor and the engineer are working well together. He is a credit to your company.

Thanks,

Patrick Wiseley, P.E.
